CLIK 'N' FIT WINDOW SCREENS

Superior Screens has just released a new do-it-yourself external window screen which can be fitted onto any home or office within 20 minutes.

Called the Klik 'N' Fit, this new aluminium, DIY modular system can be powder-coated in virtually any colour, including a range of timber-look finishes.

Superior Screens General Manager, Ms Rita Turnour, said the Klik 'N' Fit window screens had a simple assembly and installation process.

"The Klik 'N' Fit screens literally just click and fit into place, it takes about five minutes to assemble and 15 minutes to install," Ms Turnour said.

"The horizontal slats click straight into the locking plugs on the slotted vertical box posts.

"Once all the slats are in place, the Klik 'N' Fit just needs to be installed to the wall with brackets which slot into the end of the slotted posts - it's a simple process," she said.

The Klik 'N' Fit kit comes complete with locking plugs, slotted box posts, slats and wall brackets.

The screens are pre-made for a window width of between 600mm – 2000mm and a height of up to 1025mm. All other sizes are available as custom-made.

The screens are low maintenance, require no painting and are 100 per cent fire and termite resistant.

Superior Screens is Australia's leading producer of COLORBOND® steel and aluminium screening products which provide innovative sun control and privacy solutions to residential and commercial properties.

Superior Screens has a national network of distributors – for your closest, please call 1300 766 799 or visit www.superiorscreens.com.au For more information:
